GreenEarth Heritage Foundation, Inc. Philippines was registered with the Securities and Exchange Commission of the Philippines on May 22, 2009. It is accredited by the Philippine Council for NGO Certification.

About the COVER

Who would have known?

Who would have thought that this would be the year ordained by the Good Lord to allow this astounding blessing to our ministry!

On our 7th year living out our mission of transforming land and transforming lives, our beloved GreenEarth Farmer's Child makes it to Harvard!

All praise to the Living God and Savior Jesus Christ. He alone deserves all the glory in what He has done in Romnick Blanco's life.

About the Foundation

Green Earth Heritage Foundation is a holistic Christian organization whose mission is to preserve the environment, adhere to sound and sustainable agricultural practices and assist in alleviation of poverty through livelihood and community development.

We are Christian

We acknowledge One God: Father, Son and Holy Spirit. In Jesus Christ alone we have the promise of salvation.

We seek to follow Jesus in His Teachings to nurture and protect all of God's gifts, in His respect for the dignity of all men and women, in His call to love others as ourselves, and in His offer of abundant life to those who choose to follow Him.

We are Stewards

The resources at our disposal are not our own.

They are entrusted by God; therefore, we are committed to sound and sustainable agricultural practices that will preserved and protect the environment for the generations to come.

We Believe in the Dignity of Every Human Being

We are committed to help our workers and beneficiaries fulfil their dreams through fair compensation, benefits and a housing plan right on GreenEarth's land donation.

This VILLAGE OF HOPE will adhere to the principles of green design. The plan will be implemented through working partnerships with professionals as well as non-stock, nonprofit organizations that share our core values of fairness, ecology, health and Christ-centeredness.

We Promote Good Health

The Bible teaches that "the body is the temple of the Holy Spirit (1 Corinthians 6:19)". We, therefore, have to make choices that will enhance wellness and prevent disease.

HOW IT ALL BEGAN

*“The earth is the Lord’s,
and everything in it.
The world and all its
people belong to him.”*

Psalm 24:1

Agrarian unrest has been a hallmark of Central Luzon’s history for over 60 years now. It is the cradle of the Hukbalahap movement which metamorphosed into the Communist Party of the Philippines and the New People’s Army.

Thus, the manifestation of idle yet fertile land has been the basis of socio-economic conflict as seen in peasant unrest and the unequal distribution of wealth experienced by our nation.

This is the social backdrop of our fledgling Foundation’s mission. Nestled in the foothills of the majestic Sierra Madre mountain range in historic San Miguel, Bulacan are over 100 hectares of bucolic hills. These were donated to GreenEarth Heritage Foundation by a generous land-owner in early 2009.

The Land was purchased roughly 40 years ago with the landowner’s dream of developing a viable agricultural endeavour. However, as is often said, “work got in the way,” and the land was left idle, susceptible to both fraudulent transactions and illegal squatting. Its lush potential was never achieved.

Hence, the decision to cede the raw Garden of Eden to our foundation to ensure its viable promise for beneficiaries without the taint of potential profiteering and the past mistake of non-use.

Over 139 families live in the foundation’s immediate vicinity, mostly in abject poverty. An overwhelming majority of the residents have only attained an elementary level of education and 48 percent of the population are below 20 years old.

GreenEarth’s mission is to assist in poverty alleviation by providing livelihoods centered in organic agriculture and by empowering communities through spiritual transformation in the Lord and Savior Jesus Christ. We believe that it is through a personal relationship with Christ alone that we will be able to bring hope, change and a bright future to the people of the community that we serve.

*"When the LORD brought back the captivity of Zion, we were like those who dream.
Then our mouth was filled with laughter, and our tongue with singing.
Then they said among the nations, "The LORD has done great things for them."
The LORD has great things for us, and we are glad."*

Psalm 128: 1-3

We rejoice in the past year's unprecedented outpouring of abundance and blessings. The GreenEarth community's sacrifices and faithfulness has truly been rewarded by our generous God, particularly in the fields of Agriculture, Education and Spiritual Transformation.

In line with the current administration's "war on drugs", GreenEarth was tapped as a haven and provider of holistic drug rehabilitation services for over 120 drug surrenderers by the San Miguel, Bulacan Mayor's Office under their Municipal Anti-Drug Campaign (MADAC). Though we do not receive financial support for this effort, the LORD provided a way for us to be able to offer decent housing on our grounds, complemented by physical, agricultural and most of all, spiritual activities to shepherd these former drug dependents back to a life of normalcy and community productivity for several months. Three meals a day was provided by the municipality of San Miguel, Bulacan.

As result, three (3) former drug surrenderers sought to become our beneficiaries as they embraced the GreenEarth way of life. Moreover, a number have surrendered their lives to the Lord. Someone opened his home for Bible studies and worship, after their spiritual transformation and desire to be productive citizens once again.

We witnessed a burst of treeplanting activities during the rainy season from various corporate entities and civic organizations namely: Acer Philippines, Avega, Converg, Integrated Bar of the Philippines-Makati Chapter, Microsourcing, NCSI, Willis Towers Watson and Xavier School .

We welcomed foreign volunteers who stayed not just for the day but for several days to a week for the first time this year! The Wei sisters from Houston, Texas and the Yi family from Chicago, Illinois. This was in line with their respective parents' desire to immerse their American children to their country of origin's rural way of life. New friendships

and fond memories were established from both the host families and guests' perspectives.

Three generous donors—AY Foundation, the Municipality of San Miguel, Bulacan, and Premier VIMA Realty Inc. realized our dream to be able to build pre-fabricated houses on-site using more typhoon-resilient Galvalume technology. It is noteworthy that these "Bahay Tibay" models can not only withstand the virulent typhoons, they are likewise augmented with a twin set of 10,000-liter capacity rainwater catchment ferrocement tanks to supply its respective domestic water requirements.

The consistently generous Acer Philippines funded the replacement of four (4) anahaw roofs which were severely damaged during the onslaught of Typhoon Santi in 2013. Hence, our kitchen, working men's dormitory, rest room & shower hut and vermiculture shed are now sporting brand-new long-span roofing. Moreover, Acer once again donated eight rainwater harvesting tanks to GreenEarth. Thus, increasing our total rainwater harvest tanks to sixty four (64).

On the agricultural front, the Philippine Tropical Forest Conservation Foundation (PTFCF) entered into a mutually-beneficial agreement to make GreenEarth a partner site in reforestation. Through their assistance, we are now growing and nurturing over 35 species of indigenous forest hardwoods, 5000 in total. This is in line with our respective missions to transform the Philippine landscape through the revival of indigenous sustainable and environmentally- sound forests. Hence, our farmer-beneficiaries led by our fearless farm manager Aileen Deocampo trekked for days in the nearby Sierra Madre mountain range in order to apply learned techniques from PTFCF's appointed technical mentor, the Pampanga Agricultural State University, in order to harvest and transport indigenous seedlings back to GreenEarth's farm site for their immediate propagation

Under the auspices of the Bureau of Soil and Water Management (BSWM), our Small Farm Reservoir A which was initiated in 2013 was finally completed this year. It is presently a vital source of rainwater for our farm site. Furthermore, the Department of Agriculture, under the able leadership of Secretary Manny Pinol, released a tractor grant for GreenEarth! The brand-new Kubota tractor has been a major boon to the farm's key activities since its arrival this particular fiscal year.

Nothing compares to the immense blessings GreenEarth received in 2017 relative to its Educational and Spiritual Transformation programs and initiatives. We have witnessed God's direct provision and generosity in the following substantive developments:

1) We are now on our second year of our Homeschool Program. This vital mission is led by board -certified Marlourd Borromeo, a University of the Philippines-Diliman graduate of B.S. Elementary Education (*cum laude*), major in Teaching in the Early Grades. Our students are the offspring of our forest guardians and organic farmers who have fully committed to our holistic mission by living right on GreenEarth's land. They range from Kindergarten to Grade 5. Hence, the yeoman task of Teacher Marl to conduct daily multi-level classes.

2) We now have a full complement of Christian missionaries led by the indefatigable Pastor Noel Baylon and his able team from Camarines Sur. They conduct a weekly community worship service every Saturday morning and Bible studies on Friday evenings. Pastor Noel's team focuses on strengthening marital ties, parental and children's duties and leading the drug surrenderers to a complete recovery through Biblical principles and their acceptance of Jesus Christ as both personal Savior and Lord.

3) To further enhance their faith-based missions, we were able to send our farm manager and site administrator Aileen Deocampo and Pastor Noel Baylon to a life -enriching Holy Land Bible Study Tour of Israel and Jordan in April of 2017.

4) Our roster of college scholars has further expanded through the kind auspices of De La Salle Araneta University's president Dr. Bjorn Santos who has granted us six (6) Agriculture college scholarships, allowing us to send 4 farmers of GreenEarth who are high school graduates and 2 Grade 12 students to the College of Agriculture for SY 2017-2018. Given the difficulty to recruit agricultural professionals to our missionfield, to be able to educate our own is a tremendous answered prayer for us.

5) We likewise have witnessed the respective graduation of our initial batch of scholar-beneficiaries namely:

a) Jerouszel Bermudez from the University of the East (UE) with a Bachelor of Science in Business Administration in December 2016. Today, she is a highly-regarded full time employee of a reputable Anglo-American multinational firm in Bonifacio Global City.

She is the first person in her family to graduate from college and to now hold a corporate job in a global multinational firm.

b) Renz Hernandez from UE with a Bachelor of Science in Accounting Technology in April 2017. He topped UE's internal examination vying for 5th year BS Accountancy taken in May of 2017, which is necessary for him to transfer to the BS Accountancy course and degree. Renz is expected to graduate in December 2018.

c) Romnick Blanco from the International School Manila in May 2017. He is the first farmer's child to be granted a full scholarship at the venerable ISM in their 92 -year history starting in 2012. We are extremely blessed by the miraculous fact that Rom has been accepted into the world's leading university, Harvard in Cambridge, Massachusetts. He was granted a full-ride scholarship by Harvard and will enter by the 2018 school year as he opted to pursue a gap year as the premier university highly encourages its acceptees to take a year of deferral, having seen its benefits on those who grab the opportunity to do so. He was likewise offered full-ride scholarships by three other prestigious universities such as: Dartmouth College, NYU-Abu Dhabi and Wesleyan University, respectively. This is genuinely unprecedented and a welcome blessing for our humble foundation.

It is our common vision and commitment to see our mission to Transform Land and Transform Lives through to completion. We can only accomplish this with the painstaking hard work, thoughtful innovation and unwavering support of our noble associates, colleagues, farmer-beneficiaries, faithful donors, strategic partners and likeminded stakeholders.

THANK YOU VERY MUCH for making the past fiscal year as momentous as one can ever envisage. God bless you all!

Sincerely,

Mylene V. Matti

Mylene V. Matti.M.D.
President and Executive Director

AGRICULTURAL Development

TRANSFORMING LAND

Construction of 8 Rainwater Harvesting Tanks

ACER Philippines continues to invest in our Water Resource Infrastructure at GreenEarth

We thank ACER Philippines for their support in this very critical need at the farm. Through their help, we were able to construct 8 new rainwater harvesting tanks from August to November this year. This will greatly help our efforts to scale-up our plantation and rainforestation efforts.

Post-typhoon Devastation Replacement of FOUR ROOFS at GreenEarth

Farm Kitchen, Male Barracks, Restrooms and Vermiculture shed
An ACER Philippines Sponsorship

In 2013, we were devastated by Typhoon Santi and in the next 3 ½, rebuilding was a slow process. Donations were very hard to find with many areas hard hit, most especially with Typhoon Yolanda taking place 2 ½ weeks later.

We rejoice at funding from ACER Philippines to continue to help us rebuild!

INSTALLATION OF A SOLEY-SERVED TRANSFORMER

A donation of One Meralco Foundation

In the third quarter of 2016, GreenEarth received this gift from One Meralco Foundation.

We thank Mr. Jeffrey Tarayao, the president of One Meralco Foundation, for his leadership and great empathy for our community. This has finally solved our problems with electricity fluctuations and voltage run-offs caused by our distance from the grid, threatening to destroy sensitive equipment and hindering productivity in our processing facility.

Forest Foundation Philippines

Restoring the lost lush and green glory of the Sierra Madre
Starting at GreenEarth

Forest Foundation Philippines identified the Sierra Madre as the NUMBER 1 priority area for reforestation, the other three areas being Palawan, Samar and Leyte and Bukidnon and Misamis.

Given our geographic location, we are elated by the partnership with the Forest Foundation given their resources and knowledge to help us fulfil our dream to bring back the indigenous trees of

the Sierra Madre and biodiversity in all its glory at GreenEarth.

Our partnership started off with a Php 100,000 grant from Forest Foundation this year. Said grant was used to bring our farmer beneficiaries to Pampanga State Agricultural University, the technical partner assigned to us by Forest Foundation. In PSAU, our farmers were trained on the Reforestation Model. They became enthusiastic at the exposure to new technology and plant species at PSAU.

The grant was also used for wildlings collection at the Sierra Madre and the installation of growth chambers on our land. We can't wait for our next endeavour with Forest Foundation Philippines!

TYPHOON RESILIENT HOMES AT LAST

GreenEarth’s “Bahay-Tibay”

GreenEarth Bahay Tibay donated by AY Foundation.

GreenEarth Bahay Tibay donated by Premier VIMA Realty Inc.

GreenEarth Bahay Tibay donated by the Muicpality of San Miguel, Bulacan.

After experiencing the one strong typhoon after another and the recurrent devastation they always cause, we realize that native materials such as cogon, anahaw, sawali, and bamboo are no longer tenable given the vicissitudes of climate. One day we have torrential rains, on the next we have extreme winds – it’s a difficult situation.

We researched and found the Jacinto Color Steel Pre-Fabricated House Model. It uses patented *Galvalume* coating (combination of galvanized iron and aluminium-zinc) which is said to have superior corrosion protection, durability, and a lifespan that is 2 to 4 times that of traditional galvanized metal. The model is said to be storm-proof and can withstand winds of about 250kph. We are also using steel doors, and removed any wood components in the construction to prevent termites.

We thank AY Foundation, Premier VIMA Realty, and the Municipality of San Miguel, Bulacan.

Because of them, we were able to construct 3 units of Bahay Tibay with 2 rainwater harvesting tanks and a portable solar power source for each unit, enough to supply one power outlet to charge a cellphone and lights to be used at night.

Metro Retail Group

GreenEarth's new retail distribution frontier

We are grateful to the Metro Retail Group who has believed in our vision, mission, and programs. After meetings in Metro Manila and the visit of members of their Retail Distribution Group to our farm on Feb. 17, 2017, after which, they decided to partner with us.

Our moringa tea and powder are both retailing in 11 Metro Retail stores in Market!, Alabang, Ayala Cebu City, New Port Pasay, Lucena, Legazpi, Mandaue, Mambaling Cebu City, Angeles, Binondo, and Lapu-Lapu.

Manila Water Foundation

“One with us in improving water quality at the farm”

In 2010, we appealed to Manila Water Foundation to assist us in how we can disinfect our water supply coming from shallow tube wells. Back then with our operations barely starting, they recommended a low-cost chlorination set-up, as taught to our people by their Engr. Labuntog, mixed in drums. It is a low-cost disinfection system which we have been faithfully using for the last 7 years.

The time has come, however, to take our process to the next level. We are now FDA-registered and with our flagship products selling in 22 stores, our processing operations just keep on expanding. It is now time for us to upgrade our water disinfection system. We appealed to Manila Water Foundation anew to once again help us test the physico-chemical quality of our water and to make recommendations on how we can improve our system. They gladly sent technicians to the farm to collect samples for lab testing in their headquarters in Quezon City. When the results came out, they recommended we set up our own jet chlorination system. They helped us with the technical aspects by referring us to their top merchants.

We thank Manila Water Foundation for their help. As of this writing, we have ongoing fundraising for our jet chlorination system.

Integrated Bar of the Philippines — Makati Chapter

We are grateful to the IBP-Makati Chapter for their donation to support the planting 1,000 narra tree seedlings and 4 rainwater harvesting tanks. Their investment will go a long way into making our planet a greener place!

SFR A Rehabilitation

In 2013, we received a grant from the Bureau of Soils and Water Management (BSWM) to construct 2 small farm reservoirs (SFR).

We have been blessed to have renewed this partnership with Phase 2 – The SFR Rehabilitation. This year marks the return of DSWD –DA RFO 3 engineers to rehabilitate what they have started in 2013. They concretized the small farm reservoirs to prevent seepage of collected water during the rainy season and improved the design. This will greatly help us as we continue to plant thousands of trees. The plan is to siphon the accumulated water in SFRs to existing rainwater harvesting tanks nearby to prevent evaporation. We thank the BSWM and the Region 3 Department of Agriculture Engineering Group for giving us 2 small farm reservoirs.

MOA signing for Tractor Grant

Since 2014, we have long been hoping for a tractor and this year we finally got it!

The tractor has revolutionized soil preparation at the farm. In addition, this year marks our first attempt at organic rice production at GreenEarth.

We are conducting our experimental models for organic black rice through the technical assistance of the Organic Agriculture Section of DA RFO-3.

Tree Planting **EVENTS**

CONVERGA Tree Planting

Converga Treeplanting
June 18, 2016
50 Acacia Trees

AVEGA Tree Planting

Avega Treeplanting

160 Moringa Trees

For 6 straight years, Mr. Manuel Wong, the country manager for ACER Philippines, personally leads the company's employees in the treeplanting. It is always a day of not just planting, but also programs and fun-filled activities.

Six years of partnership marks 6,000 trees planted at GreenEarth!

COMMUNITY Development

TRANSFORMING LIVES

Yi family from Chicago, Illinois

The Yi Family are first-time volunteers from the US who stayed with the GreenEarth family for several days. They planted with us, taught our children singing, and gave our community the gift of toys and joy. We thank the Yi Family of Illinois, USA for coming to bless our community with their donations and kind service.

"We are so grateful that your projects continue on for the community despite you returning Stateside. God Bless your family!"

Wei sisters from Houston, Texas

Thank you, Anna and Mia Wei, for sharing your time and talents in dancing with our children at GreenEarth! Your contributions to our denuded forests through the many hours of work of your hands will surely be blessed by our Good Lord. THANK YOU for your love and courage to make a difference in our world. God bless you always!

HOMESCHOOL PROGRAM: Year 2

In 2015, we took matters into our own hands by pulling out the youngest members of our community - from Kinder to Grade 2 - out of public school and started our own HomeSchool Program here at GreenEarth. We are happy to announce that we have now completed our Year 2. In 2016, we welcomed Teacher Marl, a *cum laude* from UP Diliman with a degree in Education, major in Teaching in the Early Grades, into the GreenEarth family. We are extremely grateful to have successfully finished Year 2 of our HomeSchool Program and to Teacher Marl for answering the call to serve our farmers' children because of her staunch faith in the Lord Jesus Christ.

Drug-Related Surrenderers find safe haven at GreenEarth

President Duterte's call to drug addicts nationwide to surrender has been met with overwhelming success. Sadly, the local government units were caught unprepared and do not have adequate logistic preparations to handle the problem. The mayor of San Miguel, Bulacan and PNP Chief "knocked" at our door in earnest appeal, imploring us to help take care of our countrymen coming out to turn their backs away from drugs. As the only NGO serving the foothills of the Sierra Madre Mountains in San Miguel, Bulacan with lots of space, healing greenery and a built-in opportunity for community service, we considered this proposition a win-win. We provided a venue for healing and rehabilitation, while they helped restore our denuded forests and joined hand-in-hand with us in building our Village of Hope at GreenEarth!

Missionary Team under Ptr. Noel

We took in 120 countrymen in need, despite our very limited housing infrastructure and resources, and truly saw how God's hand worked to help both the drug surrenderers and our foundation.

For 2 and a half years, we didn't have any missionary teams in our community. We conducted our Bible studies using downloaded Tagalog lectures from the internet. We downloaded videos, lectures, and songs from the internet to facilitate our worship sessions, eventually creating an archive.

By the grace of God, a kind supporter of GreenEarth informed Pastor Noel about our need for missionary workers to help with the spiritual transformation of our community. Although Pastor Noel has been at GreenEarth a few times, the advent of the drug surrenderers moved him to action to help even more. A group of volunteers came with Pastor Noel – Leo, Joshua, Karen, and Suzette – in August of 2016. Since then, they have conducted weekly worship sessions every Friday and Saturday in the GreenEarth community. Leo and Joshua even holds guitar, drum, and piano lessons for our kids at GreenEarth.

Holy Land Bible Study Tour of Aileen and Ptr. Noel

Our founders made a pledge to send the longest-serving mission worker of GreenEarth to Israel on GreenEarth’s 7th year, as 7 is the number of perfection. Aileen has been serving the missionfield for over 7 years, and so they decided to send her with Pastor Noel on a two-week Bible study tour of Israel.

College Graduation of GreenEarth Scholar Jerouszel Bermudez: December 2016

Bachelor of Science in
Business Administration

Jerouszel Bermudez from the University of the East (UE) with a Bachelor of Science in Business Administration in December 2016. Today, she is a highly-regarded full time employee of a reputable Anglo-American multinational firm in Bonifacio Global City.

She is the first person in her family to graduate from college and to now hold a corporate job in a global multinational firm.

College Graduation of GreenEarth Scholar Renz Hernandez: April 2017

Bachelor of Science in Accounting
Technology

Renz qualifies for 5th year BS Accountancy June 2017

Renz Hernandez graduated from UE with a Bachelor of Science in Accounting Technology in April 2017. He topped UE's internal examination vying for 5th year BS Accountancy taken in May of 2017, which allowed him to enter the BS Accountancy Program. Renz is expected to graduate in December 2018.

Highschool Graduation at ISM of Romnick Blanco

A Journey of Faith

**We will praise the LORD with all of our hearts,
we will tell of His wonderful deeds! - Psalm 9:1**

Our tears of joy are flowing like a river!

Our beloved GreenEarth child Romnick Blanco, the first farmer's child to win a scholarship at the International School of Manila in its 92-year history back in 2012 just graduated from high school on May 26, 2017.

The LORD GOD Almighty has poured out His blessings upon him even more!

Rom won FOUR full-ride scholarships---- Harvard College , the King Scholarship of Dartmouth College (only 3 are selected globally each year) , the Freeman-Asian Scholarship of Wesleyan University (listed no. 3 on the 2016 Forbes' list of Top Liberal Arts College of the USA; one Filipino is selected each year) and New York University-Abu Dhabi.

He has accepted Harvard.

It is now seven years and 5 months to be exact since Rom braved a bridge-less river and kilometers of unpaved roads two hours each way from his home, at the risk of drowning many times during the rainy season, in his quest for a brighter future through education. It was in January 2011 when he became a sponsored child of our foundation, the time when he started attending English and computer literacy classes as well as Bible studies at the farm. Time flies so quickly. It has been these many years of intensely mentoring him both academically and spiritually as our GreenEarth beneficiary.

The LORD has lifted Him higher! His grit, determination and humble obedient spirit has brought him blessings.

His life story:

https://www.youtube.com/watch?v=v3pv-XVD_SQ

<http://www.greenearthheritage.org/.../a-farmers-child-wins-t.../>

This is an honor and momentous occasion for us all who have been bound together by our mission/ vision.

For those among you who have supported our foundation in many ways, this is a day of rejoicing. Together, we are about to send a farmer's child to Harvard. We cannot thank you enough for your invaluable partnership.

With Rom's enormous blessings, the Lord has shown us a mere glimpse of what He has in store for our people at GreenEarth ahead. The best is yet to come!

"For I know the plans I have for you, plans to prosper you and not to harm you, plans to give you hope and a future!" Jeremiah 29: 11

To our Great God and Savior Jesus Christ alone belongs all the honor, glory and praise!

Let's press on in the lifelong ministry of transforming land and transforming lives! Thank you very much!

De La Salle Araneta University (DLSAU) grants College Scholarships in Agriculture to 6 GreenEarth-affiliated beneficiaries

Our roster of college scholars has further expanded through the kind auspices of De La Salle Araneta University's president Dr. Bjorn Santos who has granted us six (6) Agriculture college scholarships, allowing us to send 4 farmers of GreenEarth who are high school graduates and 2 Grade 12 students to the College of Agriculture for SY 2017-2018 .

Celebration of Praise and Thanksgiving

It's not everyday that we can send a kid to Harvard. So, on May 27, 2017, we decided to hold a celebration of praise and thanksgiving to declare what the Lord has done. We invited as many of our donors to come. It was the first time we brought all the kids from GreenEarth at Bulacan to Metro Manila so they can listen to Rom share his story and be inspired that nothing is impossible with the Lord.

GreenEarth Kids at Aviron Zoo

The first field trip of the children of GreenEarth happened at Aviron Zoo. This was a treat to all the children after our Celebration of Praise and Thanksgiving.

8th Pamaskong Handog at GreenEarth

Our 8th Pamaskong Handog at GreenEarth was a beautiful time of reflection and thanksgiving for the goodness of the LORD the past year.

We had the blessing of a light rain shower in the morning which made the entire day very cool and breezy at the farm. We started off with Praise and Worship. This was followed by a scrumptious lunch consisting of organic lechon, chopsuey and everyone's favorite pancit. It was the first time our farmers roasted their own pigs ever at the farm and everyone was really excited stuffing the lechon with lemongrass, oranges, oregano, basil and lots of garlic. The skin of the lechon was basted continuously with coconut water while being roasted. The farmers' wives also prepared bibingka-sa-pugon which was enjoyed by all.

We wish to THANK YOU ALL VERY MUCH who gave toward our gifts, prizes and games for the special day. Each year's Pamaskong Handog is something all of our farming families look forward to. God bless you all for your generosity and love.

GreenEarth Prayer Meeting and Thanksgiving

We salute our kind and committed donors and volunteers whose faith in our mission and vision continues to propel us forward and upward.

Thank you very much.
